Corporate Law is often times viewed as quiet and boring. Newspaper headlines are screaming otherwise these days. The focus of this seminar is current legal issues pertaining to Officers, Directors and Legal Counsel of both public and private entities. Today’s ethical issues confronting corporate counsel and multi-entity representation will be emphasized. The ever increasing demand for audit letter reporting will be reviewed in depth as well as today’s changing Shareholder and Equity Landscape.

Any attorney who provides legal counsel to any business in today’s evolving regulatory and reporting climate should attend this seminar. Corporate Officers, Directors and Shareholders are also welcome to attend to learn first hand about current issues in corporate law.
